3. NEW STANDARDS, INTERPRETATIONS AND AMENDMENTS

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2021, except for the adoption of new standards effective as of 1 January 2022. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective and anticipates that the adoption of these new standards and amendments to the existing standards will have no material impact on the financial statements of the Group in the period of initial application.

- **Amendments to IFRS 3: Definition of a Business** – The amendment to IFRS 3 Business Combinations clarifies that to be considered a business, an integrated set of activities and assets must include, at a minimum, an input and a substantive process that, together, significantly contribute to the ability to create output. Furthermore, it clarifies that a business can exist without including all the inputs and processes needed to create outputs. These amendments had no impact on the consolidated financial statements of the Group but may impact future periods should the Group enter into any business combinations.
- **Amendments to IFRS 7, IFRS 9 and IAS 39 Interest Rate Benchmark Reform** – The amendments to IFRS 9 and IAS 39 Financial Instruments: Recognition and Measurement provide a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainty about the timing and/or amount of benchmark-based cash flows of the hedged item or the hedging instrument. These amendments have no impact on the consolidated financial statements of the Group as it does not have any interest rate hedge relationships.
- **Amendments to IAS 1 and IAS 8 Definition of Material** – The amendments provide a new definition of material that states, "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity."

3. NEW STANDARDS, INTERPRETATIONS AND AMENDMENTS (CONTINUED)

The amendments clarify that materiality will depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users. These amendments had no impact on the consolidated financial statements of, nor is there expected to be any future impact to the Group.

- **Conceptual Framework for Financial Reporting issued on 29 March 2018** – The Conceptual Framework is not a standard, and none of the concepts contained therein override the concepts or requirements in any standard. The purpose of the Conceptual Framework is to assist the IASB in developing standards, to help preparers develop consistent accounting policies where there is no applicable standard in place and to assist all parties to understand and interpret the standards. This will affect those entities which developed their accounting policies based on the Conceptual Framework. The revised Conceptual Framework includes some new concepts, updated definitions and recognition criteria for assets and liabilities and clarifies some important concepts. These amendments had no impact on the consolidated financial statements of the Group.
- **Amendments to IFRS 16 Covid-19 Related Rent Concessions** - On 28 May 2020, the IASB issued Covid-19-Related Rent Concessions - amendment to IFRS 16 Leases. The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a Covid-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the Covid-19 related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification. The amendment applies to annual reporting periods beginning on or after 1 June 2020. Earlier application is permitted. This amendment had no impact on the consolidated financial statements of the Group.

5. LEASES

Group as a lessor

The Group has entered into leases on its office property portfolio

Group as a lessee

The Group leases various land, building and equipment. Rental contracts are typically made for fixed periods of 1 to 2 years but may have extension options. Extension and termination options are included in a number of property and equipment leases across the Group. These are used to maximise operational flexibility in terms of managing the assets used in the Group’s operations. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor.

The Group has lease contracts with lease terms of 12 months or less and has certain leases of equipment with low value. The Group applies the ‘short-term lease’ and ‘lease of low-value assets’ recognition exemptions for these leases.

Following the impairment test performed for One Peninsula, the Group assessed the recoverable amount of the identified CGU to which the goodwill relates to be higher than its carrying amount, therefore no impairment loss was recognized.

7 INVESTMENT PROPERTY (CONTINUED)**Valuation processes**

The Company’s investment properties were valued at 31 December 2021 by Colliers Romania, external, independent evaluator, authorized by ANEVAR, having recent experience regarding the location and nature of the properties evaluated. The valuation models in accordance with those recommended by the International Valuation Standards Committee have been applied and are consistent with the principles in IFRS 13. Also the Group’s assets - 29 apartments and 31 parking spaces owned by subsidiary One Mircea Eliade Properties SRL were valued at 31 March 2022 for change in destination from sale to lease. The new acquired building owned by the subsidiary Bucur Obor SA was also valued at fair value as at 31 March 2022.

For all investment properties, their current use equates to the highest and best use. The valuation techniques used in determination of the fair value of investment property are:

- a) The fair values are determined through the application of the market comparison technique. The valuation model is based on a price per square meter for both land and buildings, derived from data observable in the market, in an active and transparent market;
- b) Discounted cash-flows (DCF) method. The valuation model based on the DCF method estimates the present value of net cash flows to be generated by a rented building considering occupancy rate and costs to be paid by the tenants. The discount rate estimation considers, inter alia, the quality of a building and its location;
- c) The Residual Approach of valuation is used when a property has development or redevelopment potential, and it is needed when there is an element of latent value that can be released by the expenditure of money on a property. This approach assumes that a potential buyer, who normally would be a developer, will acquire the subject property as at the date of valuation in its current condition and will develop it till completion and sell.
- d) The Income Approach-Direct Capitalization method provides an indication of value by converting future cash flow to a single current value. Under the income approach, the value of an asset is determined by reference to the value of income, cash flow or cost savings generated by the asset. A fundamental basis for the income approach is that investors expect to receive a return on their investments and that such a return should reflect the perceived level of risk in the investment.

Fair value hierarchy

Based on the inputs to the valuation technique, the fair value measurement for investment property has been categorized as Level 3 fair value at 31 March 2022 and 31 December 2021. This assessment is deemed appropriate considering the adjustments of the date for comparable lands and of the construction assessments, including future level of net operating revenues of the investment properties. These adjustments are based on location and condition and are not directly observable. There were no transfers from levels 1 and 2 to level 3 during the year.
